Références externes publiées

Résumé :

Ce document constitue un inventaire évolutif des références externes publiées valorisant code_aster sur des applications représentatives de dossiers industriels. Celles-ci sont regroupées par **fonctionnalités**.

Il reprend la même classification que le document [R0,00,01].

1 Algorithmes et méthodologies

1.1 Analyse modale

1.2 Analyse dynamique transitoire

P. Massin, H. Andriambololona, D. Bosselut, Methodology for a numerical simulation of an insertion or a drop of the rod cluster control assembly in a PWR, Nuclear Engineering and Design, 237 (2007), pp.600-606.

1.3 Analyse dynamique fréquentielle

1.4 Analyse spectrale et réponse aléatoire

I. Zentner. Use of RVT for the Computation of In-Structure Response Spectra and Peak Responses and Comparison to Time History And Response Spectrum Analysis. Earthquake Spectra, Jul 13, 2018. https://doi.org/10.1193/051417EQS090M.

1.5 Sous-structuration dynamique

1.6 Extrapolation de mesures expérimentales

1.7 Interaction sol-structure

Greffet, N., Obrembski, Ch., Clouteau, D. New efficient numerical method for non linear seismic SSI simulation. Int. Conf. on Computational Methods for Coupled Problems in Science and Engineering. COUPLED PROBLEMS 2005. M. Papadrakakis, E. Oñate and B. Schrefler (Eds).

Obrembski, Ch., Clouteau, D., Greffet, N. “Time-Frequency” domain analysis in nonlinear dynamic soil-structure interaction. EURODYN, Paris, France, Sept. 4-7, 2005.

Devesa, G., Guyonvarh, V., Clouteau, D. Use of coupled and regulatory method in Soil-Structure Interaction and Soil-Fluid-Structure Interaction for nuclear plants and dams. First European Conference on Earthquake Engineering and Seismology, Geneva, 2006.

Vandeputte, D., Viallet, E., Devesa, G., Clouteau, D. Deconvolution and Soil-Structure Interaction with ProMiss3D software based on seismic recordings on Hualien array. Paper K05, SMIRT19.

Zentner, I. Simulation of spatially incoherent, non stationary seismic free field motion and its impact on response in soil–structure interaction analysis. ECCOMAS Thematic Conference on Computational Methods in Structural Dynamics and Earthquake Engineering. Rethymno, Crete, Greece, 13-16 June 2007.

HSE/NUCLEAR DIRECTORATE Generic Design Assessment - NEW CIVIL REACTOR BUILD - Step 3 Civil Engineering and External Hazards Assessment of the EDF and AREVA UK EPR. DIVISION 6 ASSESSMENT REPORT NO. AR 09/039-P. www.onr.org.uk/new-reactors/reports/step3-uk-epr-civil-engineering-external-hazards-assessment.pdf

1.9 Recalage

1.10 Méthodes probabilistes

1.11 Conditions aux limites et de liaisons

1.12 Mécanique non linéaire

1.13 Solveurs algébriques

1.14 Fatigue

1.15 Thermo-hydro-mécanique couplée

1.16 Contact et frottement

I. Nistor, M. L. E. Guiton, P. Massin, N. Moës, S. Geniaut, An X-FEM approach for large sliding contact along discontinuities, International Journal for Numerical Methods in Engineering, vol. 78, n°12, pp. 1407-1435, 2009.

1.17 Grandes déformations et grands déplacements

D. Al Akhrass, S. Drapier, J. Bruchon and S. Fayolle, Integrating a logarithmic-strain based hyperelastic formulation into a three-field mixed finite elemnt formulation to deal with incompressibility in finite-strain elastoplasticity. Finite Elements in Analysis and Design. Volume 86, September 2014, pp. 61-70.

1.18 Flambement

1.19 Thermique

1.20 Interaction fluide-structure

1.21 Analyse limite

François Voldoire. Regularised Limit Analysis and Applications to the Load Carrying Capacities of Mechanical Components, 2000-09-11, European Congress on Computational Methods (ECCOMAS 2000), Barcelona.

François Voldoire. Chapter in Book: Limit analysis by the Norton-Hoff-Friaâ regularising method. Numerical Methods for Limit and Shakedown Analysis. Deterministic and Probabilistic Problems. Edited by M.Heitzer and M.Staat. NIC Series, Volume 15, ISBN : 3-00-010001-6, John von Neumann Institute for Computing Publishers, 2003.

1.22 Estimateurs d'erreur

1.23 Outil-métiers

2 Lois de comportement

2.1 Éléments discrets et de poutres

2.2 Thermo-élasticité

2.3 Élastoplasticité incrémentale

Thomas Helfer, Jean-Michel Proix, Olivier Fandeur. Implantation de lois de comportement mécanique à l'aide de MFront: simplicité, efficacité, robustesse et portabilité. 12ème Colloque national en calcul des structures, May 2015, Giens, France.

2.4 Élastoviscoplasticité sous irradiation

2.5 Comportement des métaux polycristallins

2.6 Géo-matériaux et milieux poreux

Ioanna Rapti, Arézou Modaressi-Farahmand Razavi, Alexandre Foucault, Fernando Lopez-Caballero, François Voldoire. Coupled S-P wave propagation in nonlinear regularized micromorphic media. Computers and Geotechnics, Elsevier, 2016, 77 (1), pp.106 – 114.

Rita Riedlbeck, Daniele Di Pietro, Alexandre Ern, Sylvie Granet, Kyrylo Kazymyrenko. Stress and flux reconstruction in Biot's poro-elasticity problem with application to a posteriori error analysis. Computers and Mathematics with Applications, Elsevier, 2017, 73 (7), pp.1593-1610.

Ioanna Rapti, Fernando Lopez-Caballero, Arézou Modaressi-Farahmand Razavi, Alexandre Foucault, François Voldoire. Liquefaction analysis and damage evaluation of embankment-type structures. Acta Geotechnica, Springer Verlag, 13, February 2018, DOI 10.1007/s11440-018-0631-z.

2.7 Comportement des bétons

P. Badel, V. Godard, J.-B. Leblond, Application of some anisotropic damage model to the prediction of the failure of some complex industrial concrete structure, International Journal of Solids and Structures, Vol.44, Issues 18-19, pp.5848-5874, 2007.

2.8 Comportement du béton armé

D.Markovic, P.Koechlin, F.Voldoire. Reinforced concrete structures under extreme loading: Stress resultant Global Reinforced Concrete Models (GLRC). CompDyn, Rethymno, Crete, Greece, 13–16 June 2007.

Ch.Combescure, H.Dumontet, F. Voldoire. Dissipative Homogenised Reinforced Concrete (DHRC) constitutive model dedicated to reinforced concrete plates under seismic loading. International Journal of Solids and Structures, Volume 73–74, November 2015, Pages 78–98. https://hal.inria.fr/hal-01634203. DOI: 10.1016/j.ijsolstr.2015.07.007.

2.9 Comportement des armatures dans les structures en béton armé

2.10 Endommagement

P. Badel, V. Godard, J.-B. Leblond, Application of some anisotropic damage model to the prediction of the failure of some complex industrial concrete structure, International Journal of Solids and Structures, Vol.44, Issues 18-19, pp.5848-5874, 2007.
